Roll Fender

1. 26 x 78 cm - 3.0 kg

2. 26 x 110 cm - 3.5 kg

3. 26 x 126 cm - 4.5 kg

"Easy inflation and deflation"

Inflation Guide

In all our fenders and buoys we use an unique strong brass valve for easy inflation and deflation. The best way to inflate a fender is just pushing air pressure from a compressor with a flat head against the valve and the fender will inflate. It is also possible to inflate the fender with a bicycle/car pump with the special adaptor. Please do not use a handset with a pin to inflate, because the pin can damage the valve. The best inflation pressure is 0.2 bar. This is the pressure where you should be able to press the body of the fender visible easy with your flat hand.

Pick-up Fender

1. 15 x 35 cm - 0.7 kg
2. 18 x 40 cm - 0.9 kg

Dumpy Fender

1. 15 x 30 cm - 0.7 kg
2. 18 x 36 cm - 0.9 kg

Pear Fender

2. 15 x 38 cm - 0.7 kg
3. 18 x 48 cm - 1.1 kg
4. 22 x 68 cm - 2.1 kg

Ring Fender

- 10 x 33 cm - 0.9 kg

Available COLOURS:

Majoni Keyrings

Keeps your key floating. With stainless steel ring.
Fenders are available with your own logo!

Valve

Our brass valve for easy inflation and deflation.

Adaptor

For easy inflation and deflation with a bicycle or car tire pump.

For deflating just push a pen slightly in the valve to let the air out. When a valve is leaking you don't have to replace your fender. You can replace the valve with turning in a bolt M3 (or a woodscrew) and pull it out with a pair of tongs. After inspecting you can push a valve back in the tube with your hand or a pen.

Marine Bucket

26 cm diameter - 7 liter

made of marine grade vinyl

Horseshoe Buoy & Fender

50 x 10 x 52 cm - 3.0 kg

Arc Fender

54 x 43 x 20 cm - 1.8 kg
